

# Sculpture

---

UNIT 4 / ADAPTIVE ART

# What is sculpture?

A **SCULPTURE** is art you can walk around and view from other sides. It can be made of any material that can be shaped into a form or figure.

# Some examples of Sculptures

---

# Which piece of art is a sculpture?

---

If you chose this one,  
you're right!

---

*What makes this a sculpture?*

It is a 3D art form that you can  
view from MANY sides.

Today let's  
look at some  
sculptures by  
**Alberto  
Giacometti**

---

# Giacometti Sculptures

---

Even though these sculptures are not realistic, can you tell what these forms are?

# Let's Make a Tin Foil Sculpture like Giacometti

---

Watch a Video Tutorial here:  
<https://youtu.be/kYDayHvcjY4>

Make sure you make the legs and arms **very long and thin** to look like a Giacometti sculpture.

Here are examples of my foil sculpture. It is flexible and can be moved into different poses. What poses can you create with your sculpture?
